ShopTrack

Business Management Platform

Sales • Inventory • Rentals • Appointments • Production • Reports

shoptrack.org • info@shoptrack.work • +1 304 503 3113

May 2026

Everything you need to run your business.

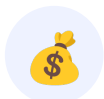

On your phone. No training needed. If you can use WhatsApp, you can use ShopTrack.

- ✗ No online bookings — missed appointments
- ✗ Cannot work when internet drops
- ✗ No idea if you're actually making profit
- ✗ Staff selling below cost without your knowledge
- ✗ No professional receipts or invoices
- ✗ Reordering takes forever

- ✓ Public booking link — customers book themselves 24/7.
- ✓ Offline mode — record sales, rentals, appointments without internet. Auto-syncs.
- ✓ Full P&L: revenue, costs, gross profit, net profit — live.
- ✓ Minimum-price block — staff cannot sell below your floor.
- ✓ Branded receipts, invoices, quotes and rental agreements.
- ✓ One-tap Reorder — vendor + price pre-filled from history.

Dashboard — your business at a glance

Live numbers the moment you log in. No reports to run.

Revenue today

Sales, rentals, and services — totalled in real time.

Profit & loss

Gross and net profit. Margin %. Trend vs last period.

AR Outstanding

Money customers owe — flagged red if overdue.

Stock alerts

Items below minimum threshold. One-tap reorder.

Today's bookings

Confirmed and pending appointments, time-sorted.

Quick chart

Revenue over time. Filter by day, week, month, year.

Sales — record every transaction in seconds

Built for speed at the counter, accurate enough for your accountant.

Quick sale

Tap a product, set qty, choose payment — done. Auto-receipt.

Multi-payment

Cash, Mobile Money, Card, Bank Transfer — even split between two.

WhatsApp receipt

Send the receipt to the customer's WhatsApp in one tap.

Invoices & quotes

Branded PDFs with your logo, address, payment details.

Minimum-price guard

Staff cannot sell below the floor you set per item.

Live stock deduction

Inventory updates the moment a sale is logged.

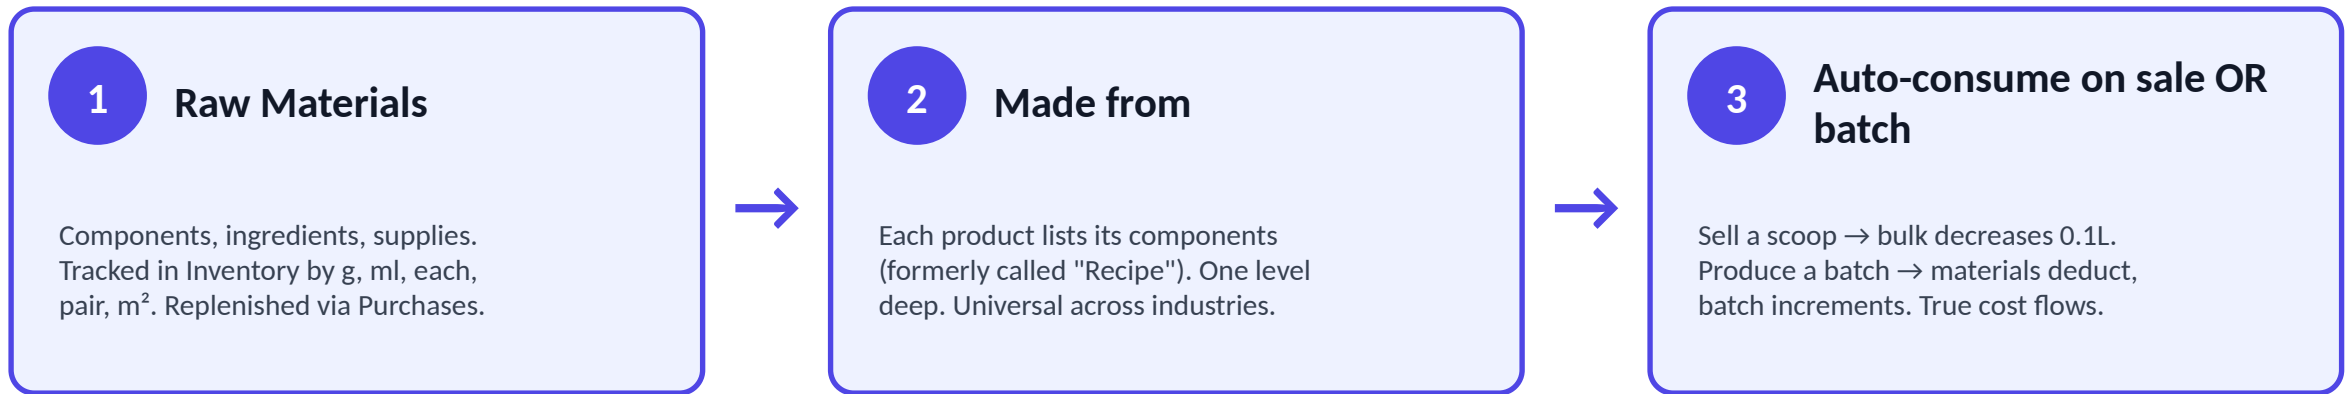

Inventory — your central catalogue, smarter than a spreadsheet

Every item. Every vendor. Every restock — connected.

Items	Name, category, brand, size, color, photos, sale price, cost, stock, minimum threshold.
Preferred Vendor	Optional — links each item to the vendor you usually buy from. Auto-fills future Purchase orders.
 One-tap Reorder	On every inventory row AND on every low-stock alert. Opens a new Purchase pre-filled with item, vendor, and last-known cost.
Purchase history per item	Open any item → History tab → see every past Purchase: date, vendor, qty, unit cost, status.
Bulk import	Upload your existing inventory via CSV in two minutes.
Photos drive sales	Up to 3 photos per item — used on booking page, receipts, and catalogue PDFs.

Production & recipe-driven sales — track what you MAKE, not just what you sell

For restaurants, bakeries, ice cream shops, shoemakers, furniture makers, cosmetics producers — any business that turns raw materials into products.

Two examples: (1) Ice cream shop — Raw Materials (cream/milk/sugar/vanilla beans) → Bulk SKU "Vanilla Mix 5L" made from those four → Finished SKU "Vanilla Scoop" made from 0.1L of Vanilla Mix. Saturday: produce a 5L batch. All day: sell scoops normally — each scoop auto-deducts 0.1L. (2) Handmade shoemaker — Raw Materials (leather/sole/laces/glue) → Finished SKU "Leather Loafer" made directly from materials. Either sell pairs on demand (auto-consumes materials) or batch-produce in advance via Production.

Insufficient-stock guard — Production: if any component would go negative, Save is disabled and the shortage is shown. Sales: shortages don't block (the customer is paying) but a warning surfaces so you investigate.

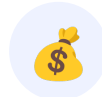

Rentals — full lifecycle, deposits & late fees

Built for wedding gowns, equipment hire, photography props, anything you rent.

Booking → check-out → return

One record per rental. Status auto-progresses through the lifecycle.

Deposit handling

Track deposits paid and refunded. Holds against damage.

Late fees

Daily late fee accrues automatically after the return date.

Digital agreements

Branded rental agreement PDF. Signed via SMS or in-person.

Condition photos

Photo before check-out, photo on return. Disputes settled.

Item status sync

Inventory shows "Rented Out" while item is with the customer.

Appointments & online bookings

Customers book themselves. You confirm in two taps. Reminders go out automatically.

Public booking page

Personal booking URL + printable QR code. Share on WhatsApp, business card, or shop window.

Availability Manager

Block whole days, lunch breaks, focus mornings, or project execution windows. Public page respects it instantly.

Multi-staff scheduling

Assign appointments to specific staff. Each staff sees their own schedule.

Auto WhatsApp

Confirmation on booking, reminder 24h before, thank-you after. All from your number.

Photos on appointments

Up to 6 photos per booking with captions — site visits, reference styles, before/after, condition reports. Flow into Project Pack PDFs.

Add to Calendar (.ics)

Push any confirmed appointment to Google, Apple, or Outlook. Date, time, address, notes, 15-min reminder — all pre-filled.

Customers — relationship records, not just contact cards

See the full history of every customer. Spot your best ones. Win back the quiet ones.

Unified profile

Every sale, rental, appointment, payment, and outstanding balance — in one timeline.

Custom customer types

VIP, Wholesale, Walk-in, B2B — define your own. Filter for marketing.

Project Pack PDF

For project-based businesses: compile every appointment (with photos), quote, invoice and supplier purchase for a client into one branded PDF.

AR per customer

Outstanding balance with one-tap "Collect" action. Send a WhatsApp reminder in seconds.

Birthday reminders

Dashboard alert when a customer's birthday is coming up. Personal touch wins repeat business.

WhatsApp from profile

Open any customer → tap WhatsApp → conversation opens pre-addressed.

AI Studio — content & docs the way you wish you had time for

Built-in AI generates marketing posts, branded documents, and product descriptions on demand.

Branded flyers

One-page flyers in your brand for promotions, new products, events. Logo + tagline + product photos.

Social media posts

Captions and copy ready for Instagram, Facebook, WhatsApp Status.

Product descriptions

Compelling listings for your booking page or catalogue.

Project Pack generator

Compile a client's entire project history into a branded PDF — one click.

Bilingual output

Generate any of the above in English or French.

Quote subject suggestions

For invoice + quote subject lines, AI suggests options based on the line items.

Accounting & reports — your numbers, demystified

No accounting degree required. Honest P&L, no hidden numbers.

P&L Report

Revenue, COGS, gross profit, operating expenses, net profit. Filter by period.

Cash flow

Cash in / cash out — money moving, not just accrued.

COGS auto-calculated

Every sale uses the item's real cost (or batch cost for produced items).

Expense categorisation

Rent, salaries, fuel, marketing, etc. Custom categories you can edit.

AR / AP

Outstanding from customers / owed to vendors. Aging buckets.

Export to Excel

Any report exports to .xlsx for your accountant.

Bilingual: English & French, switchable per user

- Toggle EN ↔ FR on the login screen. Your choice is remembered.
- Each user account has its own language preference. Owner can be in EN, accountant in FR.
- Every screen, button, modal, receipt, and PDF respects the chosen language.
- WhatsApp templates also bilingual — confirmations and reminders go out in the customer's expected language.
- Add new vocabulary (custom categories, customer types) in the language you prefer.

Pricing — simple, all-inclusive, no surprises

One platform, every feature. No "Premium tier" with the good parts locked away.

Trial

Free

30 days · all features

- ✓ Two months free
- ✓ Priority support
- ✓ Onboarding session
- ✓ Early access to new features

Why business owners switch to ShopTrack

Pays for itself in week 1

One missed appointment or one bad sale costs more than a year of ShopTrack. Most owners save 10–15 minutes a day on routine work.

No training, no installation

Open the link, log in. If your staff can use WhatsApp, they can use ShopTrack. It runs in any browser.

Real human support

Email, WhatsApp, and phone — answered by a real human, not a chatbot. Mon–Sat 7am–9pm.

Built for African markets

XAF / NGN / GHS / USD / EUR / GBP support. Mobile Money as a first-class payment method. WhatsApp as a core channel.

Offline-first

Internet drops? Keep recording. Everything syncs automatically when you reconnect.

Your data stays yours

Export everything to Excel any time. No lock-in. Cancel and download your full history.
